

AMENDED IN SENATE APRIL 6, 2015

**SENATE BILL**

**No. 765**

---

---

**Introduced by Senator Wolk**

February 27, 2015

---

---

An act to amend Section ~~2827~~ of 399 of, and to add Sections 399.5 and 399.6 to, the Public Utilities Code, relating to energy.

LEGISLATIVE COUNSEL'S DIGEST

SB 765, as amended, Wolk. Net energy metering: eligible customer generators.

*The Reliable Electric Service Investment Act requires the Public Utilities Commission (PUC), in evaluating energy efficiency investments, to ensure that local and regional interests, multifamily dwellings, and energy service industry capabilities are incorporated into program portfolio design and that local governments, community-based organizations, and energy efficiency service providers are encouraged to participate in program implementation where appropriate.*

*This bill would require the PUC, in ensuring that prudent investments in energy efficiency are made and produce cost-effective energy savings, reduce customer demand, and support the state's greenhouse gas emissions reduction goals, to contract with an independent entity to serve as the California Market Transformation Administrator (CalMTA). The bill would require the PUC to require the CalMTA to take certain actions, including, among other actions, working in concert with other energy efficiency administrators that are carrying out energy efficiency activities under the PUC's oversight to incorporate long-term market transformation strategies into the state's energy efficiency portfolio and to work with the State Energy Resources Conservation and Development Commission to encourage local publicly owned electric*

*utilities to participate in the CalMTA's planning efforts and provide funding for and support the market transformation initiatives administered by the CalMTA to ensure statewide consistency and full market deployment. Because a violation of these requirements would be a crime, this bill would impose a state-mandated local program. The bill would require the PUC to consult with the CalMTA regarding demand-side energy management programs.*

*The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.*

*This bill would provide that no reimbursement is required by this act for a specified reason.*

~~Existing law, relative to private energy producers, requires every electric utility to develop a standard contract or tariff providing for net energy metering and to make this contract or tariff available to eligible customer-generators upon request for generation by a renewable electrical generation facility. Existing law requires that the net energy metering calculation be made by measuring the difference between the electricity supplied to an eligible customer-generator and the electricity generated by the eligible customer-generator and fed back to the electrical grid over a 12-month period. Existing law establishes rules for the annualized net metering calculation, which, among other things, authorizes an eligible customer-generator with multiple meters to elect to aggregate the electrical load of the meters located on the property where the renewable electrical generation facility is located and on all property adjacent or contiguous to the property on which the generation facility is located, if those properties are solely owned, leased, or rented by the eligible customer-generator. Existing law specifies that an eligible customer-generator who elects to aggregate under that provision is permanently ineligible to receive net surplus electricity compensation and the electric utility would retain any kilowatthours in excess of the eligible customer-generator's electricity load generated during the 12-month period.~~

~~This bill would delete this provision, thereby allowing an eligible customer-generator who elects to aggregate to receive net surplus electricity compensation.~~

Vote: majority. Appropriation: no. Fiscal committee: yes.  
State-mandated local program: ~~no~~-yes.

*The people of the State of California do enact as follows:*

1     **SECTION 1.** *Section 399 of the Public Utilities Code is*  
2 *amended to read:*

3     399. (a) This article shall be known, and may be cited, as the  
4 Reliable Electric Service Investments Act.

5     (b) The Legislature finds and declares that safe, reliable electric  
6 service is of utmost importance to the citizens of this state, and its  
7 economy.

8     (c) The Legislature further finds and declares that in order to  
9 ensure that the citizens of this state continue to receive safe,  
10 reliable, affordable, and environmentally sustainable electric  
11 service, it is essential that prudent investments continue to be made  
12 in all of the following areas:

- 13     (1) To protect the integrity of the electric distribution grid.
- 14     (2) To ensure an adequately sized and trained utility workforce.
- 15     (3) To ensure cost-effective energy efficiency improvements.
- 16     (4) To achieve a sustainable supply of renewable energy.
- 17     (5) To advance public interest research, development and  
18 demonstration programs not adequately provided by competitive  
19 and regulated markets.

20     (d) It is the intent of the Legislature to reaffirm, without  
21 requiring revision, California’s doctrine, as reflected in regulatory  
22 and judicial decisions, regarding electrical corporations’ reasonable  
23 opportunity to recover costs and investments associated with their  
24 electric distribution grid and the reasonable opportunity to attract  
25 capital for investment on reasonable terms.

26     (e) The Legislature further finds and declares all of the  
27 following:

28     (1) Acting under applicable constitutional and statutory  
29 authorities, the Public Utilities Commission and the boards of local  
30 publicly owned electric utilities have included in regulated  
31 electricity prices, investments that are essential to maintaining  
32 system reliability, reducing California electricity users’ bills, and  
33 mitigating environmental costs of California users’ electricity  
34 consumption.

35     (2) Among the most important of these “system benefits”  
36 investments categories are energy efficiency, renewable energy,  
37 and public interest research, development and demonstration  
38 (RD&D).

1 (3) Energy efficiency investments funded from California's  
2 usage-based charges on electricity distribution help improve  
3 systemwide reliability by reducing demand in times and areas of  
4 system congestion, and at the same time reduce all California  
5 electricity users' costs. These investments also significantly reduce  
6 environmental costs associated with California's electricity  
7 consumption, including, but not limited to, degradation of the  
8 state's air, water, and land resources.

9 (4) California's in-state renewable energy resources help  
10 alleviate supply deficits that could threaten electric system  
11 reliability, reduce environmental costs associated with California's  
12 electricity consumption, and increase the diversity of the electricity  
13 system's fuel mix, reducing electricity users' exposure to fossil-fuel  
14 price volatility.

15 (5) California's public interest RD&D investments enhance  
16 private and regulated sector investment in electricity system  
17 technologies, and are designed specifically to help ensure sustained  
18 improvement in the economic and environmental performance of  
19 the distribution, transmission, and generation and end-use systems  
20 that serve California electricity users.

21 (6) California has established a long tradition of recovering  
22 system benefits investments through usage-based electricity  
23 charges, which is reflected in at least two decades of electricity  
24 price regulation by the commission, the boards of local publicly  
25 owned electric utilities, and the mandate of the Legislature in  
26 Chapter 854 of the Statutes of 1996 (Assembly Bill 1890 of the  
27 1995–96 Regular Session of the Legislature) and Chapter 905 of  
28 the Statutes of 1997 (Senate Bill 90 of the 1997–98 Regular Session  
29 of the Legislature).

30 (7) Unless the Legislature acts to extend the mandate of this  
31 article for minimum levels of usage based system benefits charges,  
32 California electricity users are at substantial risk of higher  
33 economic and environmental costs and degraded reliability.

34 (f) (1) *The Legislature further finds and declares all of the*  
35 *following:*

36 (A) *Targeted energy efficiency market transformation initiatives*  
37 *aimed at long-term transformation of defined markets are a*  
38 *necessary component of a comprehensive, balanced, and*  
39 *cost-effective energy efficiency portfolio.*

1 (B) Because tensions can exist between market transformation  
2 initiatives and energy efficiency resource acquisition strategies,  
3 it is important to recognize the differences between what each of  
4 these strategies can accomplish and to pursue both in California.

5 (C) The existing energy efficiency portfolio overseen by the  
6 commission focuses on energy efficiency resource acquisition.

7 (D) The creation of a single entity with responsibility for  
8 planning, coordinating, and managing the execution of statewide  
9 energy efficiency market transformation initiatives in concert with  
10 other state energy efficiency activities, subject to the commission's  
11 oversight and that carries out its duties in consultation with the  
12 Energy Commission and all interested local publicly owned electric  
13 utilities, would assist the state in advancing its energy efficiency  
14 and greenhouse gas reduction goals.

15 (2) It is the intent of the Legislature that demand-side energy  
16 management programs should be coordinated, to the extent  
17 practicable, to support utility customers in making well-informed,  
18 cost-effective decisions about investments in onsite energy  
19 efficiency, demand response, and renewable distributed generation,  
20 and to provide efficiencies in the administration and delivery of  
21 ratepayer-funded demand-side energy management programs in  
22 California.

23 SEC. 2. Section 399.5 is added to the Public Utilities Code, to  
24 read:

25 399.5. (a) For purposes of this section and Section 399.6, the  
26 following terms mean the following:

27 (1) "Demand-side energy management programs" has the same  
28 meaning as set forth in Section 323.5.

29 (2) "California Market Transformation Administrator" or  
30 "CalMTA" means a private contractor selected by the commission  
31 to coordinate the planning and execution of the state's efforts to  
32 advance electricity and natural gas energy efficiency through  
33 long-term market transformation strategies.

34 (3) "Market transformation" means a strategic process to  
35 intervene in a market to create lasting change in market behavior  
36 by removing identified barriers or exploiting opportunities to  
37 accelerate the adoption of all cost-effective energy efficiency as a  
38 matter of standard practice.

39 (4) "Resources acquisition" means the generation of electricity  
40 or natural gas savings that are sufficiently reliable, predictable,

1 and measurable to replace electricity or natural gas supplies in  
2 the utility energy resource planning process.

3 (b) (1) In carrying out its responsibilities to ensure that prudent  
4 investments in energy efficiency are made and produce  
5 cost-effective energy savings, reduce customer demand, and  
6 support the state's greenhouse gas emissions reduction goals, the  
7 commission, on or before July 1, 2017, shall contract with an  
8 independent entity to serve as the California Market  
9 Transformation Administrator that will coordinate the planning  
10 and execution of the state's efforts to advance energy efficiency  
11 through long-term market transformation strategies, as well as  
12 advise on and otherwise assist the commission with the  
13 coordination of demand-side energy management programs under  
14 the commission's jurisdiction.

15 (2) The initial CalMTA contract shall be for a period of not less  
16 than five years and may be terminated if the CalMTA fails to meet  
17 the performance benchmarks established in the contract.

18 (c) (1) An entity eligible to be a CalMTA shall have a mission  
19 that is fully aligned with promoting energy efficiency and  
20 conservation, including market transformation.

21 (2) The CalMTA shall carry out its marketing, education, and  
22 outreach-related energy efficiency market transformation and the  
23 coordination of demand-side energy management programs under  
24 the Energy Upgrade California brand name.

25 (d) The commission shall require the CalMTA, at a minimum,  
26 to do all of the following:

27 (1) Work in concert with other energy efficiency administrators  
28 carrying out energy efficiency activities under the commission's  
29 oversight to incorporate long-term market transformation  
30 strategies into the state's portfolio.

31 (2) Create market conditions that will accelerate and sustain  
32 the market adoption of emerging energy efficiency products,  
33 services, and practices in California.

34 (3) Meet interim and long-term targets adopted by the  
35 commission related to the transformation of targeted markets, as  
36 well as provide a cost-effective portfolio of market transformation  
37 initiatives over the life of the contract.

38 (4) Submit to the commission quarterly reports detailing  
39 expenditures, and annual reports showing expenditures and

1 *progress towards commission-established interim and long-term*  
2 *targets.*

3 (5) *Contribute improved efficiencies in the delivery of*  
4 *ratepayer-funded energy efficiency activities in California by taking*  
5 *a statewide approach to defined markets targeted for*  
6 *transformation.*

7 (6) *Coordinate the planning for and execution of market*  
8 *transformation initiatives, as appropriate, with utility administered*  
9 *energy efficiency activities, other energy efficiency activities under*  
10 *the commission's jurisdiction, including, but not limited to, energy*  
11 *efficiency activities administered by community choice aggregators*  
12 *pursuant to Section 381.1, and low-income energy efficiency*  
13 *programs in California, including the rate-payer funded program*  
14 *required by Section 2790 and overseen by the commission, as well*  
15 *as the federal Low-Income Home Energy Assistance Program*  
16 *administered by the Department of Community Services and*  
17 *Development.*

18 (7) *Build upon the energy efficiency expertise and capabilities*  
19 *developed in the state, such as by providing flexibility for other*  
20 *energy efficiency administrators to carry out some of the market*  
21 *transformation activities identified by the CalMTA, so as to*  
22 *minimize confusion and leverage existing relationships between*  
23 *utilities, community choice aggregators, and other providers of*  
24 *energy efficiency services, and their customers.*

25 (8) *Work with the Energy Commission to encourage local*  
26 *publicly owned electric utilities to participate in the CalMTA's*  
27 *planning efforts and provide funding for and otherwise support*  
28 *the market transformation initiatives administered by the CalMTA*  
29 *to ensure statewide consistency and full market deployment.*

30 (9) *Collaborate with regional and national energy efficiency*  
31 *entities on market transformation efforts.*

32 (e) *The commission shall protect ratepayers from performance*  
33 *risks inherent in market transformation initiatives by, at a*  
34 *minimum, doing all of the following:*

35 (1) *Requiring a rigorous upfront vetting process for program*  
36 *concepts, to be conducted either by the commission as part of its*  
37 *oversight function or by the CalMTA. The CalMTA shall make a*  
38 *convincing case that each proposed market intervention would*  
39 *produce lasting energy efficiency benefits that would more than*  
40 *pay for the long-term costs of the market intervention.*

1 (2) *Balancing the level of ratepayer investment in market*  
2 *transformation initiatives against resources acquisition initiatives,*  
3 *such that:*

4 (A) *The budget for market transformation initiatives, including*  
5 *the budget to be managed by the CalMTA and the commission's*  
6 *costs associated with managing the contract with the CalMTA, is*  
7 *initially set by the commission at a level between 5 percent and*  
8 *10 percent of the total budget for energy efficiency activities*  
9 *overseen by the commission, excluding low-income energy*  
10 *efficiency programs.*

11 (B) *The reasonableness of the initial funding level for market*  
12 *transformation initiatives is evaluated by the commission over the*  
13 *course of the initial contract term with the CalMTA and adjusted*  
14 *as the commission deems appropriate to support the objectives of*  
15 *this section.*

16 (3) *Continuously evaluating the market transformation initiatives*  
17 *administered by the CalMTA and focusing on whether the targeted*  
18 *markets are evolving in the manner intended, such that the*  
19 *initiatives can be corrected mid-course or abandoned, as*  
20 *necessary, to maximize long-term energy savings from the*  
21 *CalMTA's portfolio of initiatives.*

22 (f) *In implementing this section, the commission shall consult*  
23 *with the Energy Commission to ensure that functions carried out*  
24 *by the CalMTA are appropriately coordinated with the energy*  
25 *efficiency related activities conducted or overseen by the Energy*  
26 *Commission.*

27 (g) *The commission shall evaluate and adopt, as necessary, new*  
28 *criteria to support and accurately evaluate the benefits of market*  
29 *transformation.*

30 (h) *The commission, in consultation with the Energy Commission*  
31 *and the CalMTA, shall determine when and how to reflect*  
32 *potentially achievable cost-effective electricity and natural gas*  
33 *savings from energy efficiency market transformation initiatives*  
34 *in carrying out its obligations pursuant to Sections 454.55 and*  
35 *454.56. In setting energy efficiency targets for electrical or gas*  
36 *corporations pursuant to Section 454.55 or 454.56, the commission*  
37 *shall consider whether energy savings expected to be delivered*  
38 *through market transformation initiatives administered by the*  
39 *CalMTA should be excluded from the targets established for the*  
40 *electrical or gas corporations.*

1 SEC. 3. Section 399.6 is added to the Public Utilities Code, to  
2 read:

3 399.6. (a) The commission shall consult with the CalMTA on  
4 how best to integrate demand-side energy management programs  
5 to support utility customers in making well-informed, cost-effective  
6 decisions about investment in onsite energy efficiency, demand  
7 response, and renewable distributed generation, as well as  
8 customer-sited energy storage systems, and to provide economic  
9 and organizational efficiencies in the administration and delivery  
10 of ratepayer-funded demand-side energy management programs  
11 in California.

12 (b) The commission shall consult with the CalMTA on how best  
13 to design and deploy demand-side energy management programs  
14 and encourage customer-sited energy storage systems so as to  
15 provide the most cost-effective environmental and economic  
16 benefits from an electric system planning and operation  
17 perspective.

18 (c) The commission shall include in the contract executed with  
19 a CalMTA pursuant to Section 399.5 the advisory functions  
20 specified in this section related to integrating demand-side energy  
21 management programs.

22 SEC. 4. No reimbursement is required by this act pursuant to  
23 Section 6 of Article XIII B of the California Constitution because  
24 the only costs that may be incurred by a local agency or school  
25 district will be incurred because this act creates a new crime or  
26 infraction, eliminates a crime or infraction, or changes the penalty  
27 for a crime or infraction, within the meaning of Section 17556 of  
28 the Government Code, or changes the definition of a crime within  
29 the meaning of Section 6 of Article XIII B of the California  
30 Constitution.

31  
32  
33  
34  
35  
36

**All matter omitted in this version of the bill  
appears in the bill as introduced in the  
Senate, February 27, 2015. (JR11)**
